Summary

An experienced mobile developer focusing on building Android apps. I've interned at a startup in Silicon Valley as well as in Seattle and am looking to further apply my skills to effectively solve real world problems. While I focus primarily in Android development, I also do web development as well.

Employment

Mobile Dev Intern at Voicebox Technologies Bellevue, WA   June 2014 – Present
- Developed an Android application used for audio data collection for crowd sourcing platforms and internal usage
